It's a good idea to trade around until you have a good, wide selection of these lovely cowries.

Water into another can or tube with a bottom one-tenth as big. There is our rain ten times as deep as it was in the sea. Now it is easy!

But the white, fleecy clouds we see in the sky on a summer day are formed of the same moist air that is being

CABULAIRE 199

Sun, Earth and Wind

### There's Water in the Air

Fog is really a cloud hovering over the ground.

Water goes from the wet clothes into the air as water vapor.

Water is a wonder of Nature. It is the only substance that occurs naturally in all the forms of matter—as a solid, as a liquid and as a gas.

So, un,
